

ifHdmiStatus

Implemented By

- roHdmiStatus

Supported Methods

- IsConnected() as Boolean
- GetHdcpVersion() as String
- IsHdcpActive(version as String) as Boolean

Description of Methods

IsConnected() as Boolean

Returns true if the HDMI or MHL output is connected to an HDMI device.

GetHdcpVersion() as String

Returns the version number of the currently established HDCP link.

IsHdcpActive(version as String) as Boolean

Returns true if the current established HDCP link is the specified `version` (such as "1.4" or "2.2") or higher, otherwise returns false.
