

# rolmageCanvasEvent

**This component is deprecated.**

**Beginning July 1st, 2017**, any new channels using this component will be rejected during certification.

**Beginning January 1st, 2018**, any updates to existing channels using this component will be rejected during certification.

The rolmageCanvas sends the rolmageCanvasEvent with the following predicates that indicate its valid event types:

## isRemoteKeyPressed() as Boolean

A remote key was pressed.

### GetIndex() as Integer

Returns the ID of the remote key which was pressed. Remote key IDs are listed under [roUniversalControlEvent](#).

## isButtonPressed() as Boolean

A button on the screen was selected.

### GetIndex() as Integer

Returns the ID of the button which was selected (the first parameter to AddButton).

## isScreenClosed() as Boolean

The screen was closed and is no longer displayed to the user.
